# Contents

<i>Contributors</i>	<i>vii</i>
<b>1. Biological oxidation of iron sulfides</b>	<b>1</b>
Mathilde Monachon, Magdalena Albelda-Berenguer, and Edith Joseph	
1. Introduction	2
2. Microorganisms	4
3. Biobleaching processes	6
4. Case study: Bacteria for the cultural heritage preservation	13
5. Conclusion	21
Acknowledgments	21
References	22
Further reading	27
<b>2. Microbes associated with fresh produce: Sources, types and methods to reduce spoilage and contamination</b>	<b>29</b>
Maciej Kaczmarek, Simon V. Avery, and Ian Singleton	
1. Introduction	30
2. Microbial contamination of fruit and vegetables: Spoilage and human illness	32
3. Spoilage of fruit juices	46
4. Prevention of microbial spoilage, and contamination by pathogenic microorganisms, on fresh fruit and vegetable produce	47
5. Methods to reduce spoilage of juice products	61
6. Use of nanotechnology in fresh food production	66
7. Summary	68
Acknowledgments	69
References	69
Further reading	82
<b>3. Toward rational selection criteria for selection of probiotics in pigs</b>	<b>83</b>
Weilan Wang and Michael Gänzle	
1. Introduction	84
2. Initial acquisition of early neonatal microbiome	85
3. Bacterial enteric pathogens in pigs	88

4. Probiotic at different stages of life	92
5. Selection criteria for probiotic application	98
References	101
<b>4. Mucoïd switch in <i>Burkholderia cepacia</i> complex bacteria: Triggers, molecular mechanisms and implications in pathogenesis</b>	<b>113</b>
Mirela R. Ferreira, Sara C. Gomes, and Leonilde M. Moreira	
1. Introduction	114
2. In vivo and in vitro <i>Burkholderia cepacia</i> complex mucoïd-to-nonmucoïd transition	115
3. Mucoïd phenotype due to cepacian biosynthesis	117
4. Implications of regulator-mediated mucoïd switch in virulence phenotypes	130
5. Biological functions of <i>Burkholderia cepacia</i> complex exopolysaccharide	131
6. Concluding remarks	134
Acknowledgments	135
References	135
<b>5. Phenotypic instability in fungi</b>	<b>141</b>
Philippe Silar	
1. Introduction	142
2. Phenotypic instability with nuclear genetic bases	145
3. Phenotypic instabilities with mitochondrial genetic connections	146
4. Phenotypic instabilities relying on nucleic acid-based epigenetic mechanisms	150
5. Phenotypic instabilities with protein-based epigenetic bases	152
6. Phenotypic instabilities of unknown etiology	164
7. Conclusion	168
Acknowledgments	169
References	169
