Advances in Immunology in China - Part B

VOLUME ONE HUNDRED AND FORTY FIVE

ADVANCES IN IMMUNOLOGY

Advances in Immunology
in China - Part B

Edited by

CHEN DONG

*Institute for Immunology and School of Medicine,
Tsinghua University; Beijing Key Lab for Immunological
Research on Chronic Diseases, Beijing, China*

ZHENG FAN JIANG

*Key Laboratory of Cell Proliferation and Differentiation
of the Ministry of Education, School of Life Sciences,
Peking University, Beijing, China*

Contents

<i>Contributors</i>	<i>ix</i>
1. Deciphering the pathways to antiviral innate immunity and inflammation	1
Qing Yang and Hong-Bing Shu	
1. Introduction	2
2. RLR-VISA-mediated innate immune response	4
3. cGAS-MITA-mediated innate immune response	11
4. Modulation of innate antiviral response by bile acids	20
5. TLR3-TRIF-mediated innate immune response	20
6. TNF/IL-1 β -triggered inflammatory responses	24
7. Concluding remarks	28
Acknowledgments	29
References	29
2. Tissue-resident NK cells and other innate lymphoid cells	37
Jing Zhou, Zhigang Tian, and Hui Peng	
1. Introduction	38
2. Discovery of liver-resident NK cells: A historical perspective	39
3. trNK cells in other tissues	41
4. Lineage relationship between trNK and other ILCs	42
5. Functions of trNK cells and other ILCs	43
6. Conclusion	47
Acknowledgments	47
References	47
3. The strategies of targeting the NLRP3 inflammasome to treat inflammatory diseases	55
Hua Jiang, Tao Gong, and Rongbin Zhou	
1. Introduction	56
2. Molecular mechanisms of NLRP3 inflammasome activation	57
3. Role of NLRP3 inflammasome in human diseases	62
4. Targeting the upstream events of the NLRP3 inflammasome	64
5. Targeting the components of the NLRP3 inflammasome	67
6. Targeting the positive regulators of NLRP3 inflammasome	71

7. Targeting the negative regulators of NLRP3 inflammasome	76
8. Targeting the IL-1/IL-1R interaction	82
9. Concluding remarks (opportunities and challenges)	83
Acknowledgments	84
References	84
4. Fine-tuning of antiviral innate immunity by ubiquitination	95
Yi Zheng and Chengjiang Gao	
1. The antiviral innate immune system	96
2. Ubiquitination and its crosstalk with innate immunity	97
3. Ubiquitination regulation of the innate immune system	99
4. Conclusions and perspectives	118
Acknowledgments	119
Conflicts of interest	119
References	119
5. Metabolic regulation of innate immunity	129
Shaonan Liang, Liangliang Ji, Lan Kang, and Xiaoyu Hu	
1. Metabolic regulation of myeloid cell functions	130
2. Metabolic adaptations of tissue resident myeloid cells	139
3. Mucosal immunity and metabolism	147
4. Concluding remarks	152
References	152
6. Regulation of MHC class I-independent NK cell education by SLAM family receptors	159
Shasha Chen, Dan Li, Yuande Wang, Qiaozhen Li, and Zhongjun Dong	
1. SLAM family receptors	160
2. Regulation of NK cell education by SLAM family receptors	167
3. Concluding remarks	177
Acknowledgments	178
Competing financial interests	178
References	179
7. Metalloimmunology: The metal ion-controlled immunity	187
Chenguang Wang, Rui Zhang, Xiaoming Wei, Mengze Lv, and Zhengfan Jiang	
1. Introduction	188
2. Calcium (Ca)	189

3. Zinc (Zn)	197
4. Manganese (Mn)	202
5. Iron (Fe)	211
6. Potassium (K)	213
7. Immunity controlled by unessential metal ions	215
8. Concluding remarks	217
Acknowledgments	218
References	218
