<b>1. The development and physiological and pathophysiological functions of resident macrophages and glial cells</b>	<b>1</b>
Nelli Blank, Marina Mayer, and Elvira Mass	
1. Introduction	2
2. Development of resident macrophages and glial cells	3
3. Core functions of microglia and astrocytes	10
4. Sexual dimorphism	19
5. Role of microglia and astrocytes in pathophysiology	20
6. Concluding remarks	28
References	29
<b>2. Immunology of SARS-CoV-2 infections and vaccines</b>	<b>49</b>
Dominik Schenten and Deepta Bhattacharya	
1. SARS-CoV-2 background and history	50
2. Viral entry, innate recognition, and immune evasion	50
3. T cell responses to SARS-CoV-2	61
4. Antibody responses to SARS-CoV-2	63
5. Vaccines against SARS-CoV-2	69
6. Conclusions	77
References	77
<b>3. Antibody dependent enhancement: Unavoidable problems in vaccine development</b>	<b>99</b>
Lele Xu, Zhiqian Ma, Yang Li, Zhaoxia Pang, and Shuqi Xiao	
1. Introduction	100
2. ADE of representative virus	101
3. The molecular mechanism that produces ADE	107
4. Development of vaccine to eliminate ADE	115
5. Effect of adjuvant and inactivation selection on ADE	119
6. Conclusions and future prospects	119
Acknowledgments	124
References	124
