# Contents

<i>Contributors</i>	<i>vii</i>
<b>1. Lipid production by oleaginous yeasts</b>	<b>1</b>
Atrayee Chattopadhyay and Mrinal K. Maiti	
1. Introduction	2
2. Microbial lipid and their industrial applications	4
3. Overview of lipid biosynthesis in yeast	15
4. Characteristics of the prominent oleaginous yeasts	26
5. Genetic engineering strategies adopted in oleaginous yeasts	39
6. Various genetic elements, tools, and techniques used in oleaginous yeasts	56
7. Conclusion	68
Acknowledgments	69
References	69
<b>2. Sulfate reducing microorganisms in high temperature oil reservoirs</b>	<b>99</b>
Angeliki Marietou	
1. Introduction	100
2. SRM in high temperature oil reservoirs	101
3. SRM associated activities in high temperature oil reservoirs	110
4. Adaptation to life in high temperature reservoirs	115
5. Future perspectives	123
Acknowledgment	123
References	123
<b>3. Biological treatments of mercury and nitrogen oxides in flue gas: biochemical foundations, technological potentials, and recent advances</b>	<b>133</b>
Zhenshan Huang, Zaishan Wei, Meiru Tang, Shan Yu, and Huaiyong Jiao	
1. Introduction	134
2. Biotransformation of mercury and nitrogen oxides	140
3. Technological advances in bioremoval of mercury and nitrogen oxides	144
4. Prospects and outlooks in future researches	161
Acknowledgments	161
References	162

<b>4. Uninvited Guests: a Chronology of Petri Dish Contaminations</b>	<b>169</b>
Gilbert Shama	
1. Introduction	169
2. Contamination incidents leading to antagonism	176
3. Contaminations by species <i>Novae</i>	185
4. The most renowned Petri dish contamination	188
5. Measures for preventing Petri dish contaminations	193
6. Future contaminations	196
Acknowledgment	197
References	197
