VOLUME ONE HUNDRED AND FIFTY TWO

ADVANCES IN IMMUNOLOGY

Edited by

FREDERICK W. ALT

*Howard Hughes Medical Institute Research Laboratories,
The Children's Hospital, Boston, MA, United States*

KENNETH M. MURPHY

*Washington University, St. Louis,
Missouri, United States*

ACADEMIC PRESS

An imprint of Elsevier

Contents

<i>Contributors</i>	vii
1. Renal diseases and the role of complement: Linking complement to immune effector pathways and therapeutics	1
Tilo Freiwald and Behdad Afzali	
1. Introduction	2
2. The complement system	3
3. Effector mechanisms recruited by complement	7
4. Local production of complement by kidney cells	14
5. Drugs targeting the complement system	16
6. Impact of complement on kidney diseases	21
7. Conclusions	44
Acknowledgments	45
Conflicts of Interest	46
References	46
2. Neuropsychiatric disorders: An immunological perspective	83
Ernest Aw, Yingying Zhang, Esra Yalcin, Uli S. Herrmann, and Michael C. Carroll	
1. Introduction	84
2. Neuropsychiatric diseases with an immune component	86
3. Immune diseases with a neuropsychiatric component	107
4. Immunological perspectives to studying neuropsychiatric disease	120
5. Conclusion	134
Acknowledgments	135
Author contributions	135
References	135
3. Complement as a powerful “influencer” in the brain during development, adulthood and neurological disorders	157
Tiffany J. Petrisko, Angela Gomez-Arboledas, and Andrea J. Tenner	
1. The complement system	158
2. Complement mediated events in neurogenesis, migration, development, and aging	165
3. Complement and neuroinflammation	170

4. Complement in neurological diseases and disorders	177
5. Therapeutic modulation of the complement system for neurologic disorders	199
6. Conclusions	200
References	201
