# Contents

<i>Contributors</i>	<i>vii</i>
<b>1. The role of properdin and Factor H in disease</b>	<b>1</b>
Claudio Cortes, Caroline Desler, Amanda Mazzoli, Jin Y. Chen, and Viviana P. Ferreira	
1. Introduction	3
2. Complement system overview	4
3. Overview of complement regulation	9
4. Negative regulation of the AP by FH	11
5. Positive regulation of the AP by properdin	35
6. Conclusion	63
Acknowledgment	63
References	63
<b>2. Becoming aware of <math>\gamma\delta</math> T cells</b>	<b>91</b>
Willi K. Born and Rebecca L. O'Brien	
1. Introduction	92
2. A TCR-like gene without a known function	94
3. Activation of $\gamma$ genes in the thymus	96
4. Lymphocytes expressing the $\gamma$ protein on their surface	97
5. The nature of the $\delta$ protein	102
6. $\gamma\delta$ T cells everywhere	107
7. After the discovery	108
Acknowledgment	111
References	111
