VOLUME ONE HUNDRED AND TWENTY

ADVANCES IN APPLIED MICROBIOLOGY

Edited by

GEOFFREY MICHAEL GADD

Dundee, Scotland, United Kingdom

SIMA SARIASLANI

Wilmington, Delaware, United States

ACADEMIC PRESS

An imprint of Elsevier

Contents

<i>Contributors</i>	<i>vii</i>
1. Microbial communities of halite deposits and other hypersaline environments	1
Thomas P. Thompson, Julianne Megaw, Stephen A. Kelly, Jason Hopps, and Brendan F. Gilmore	
1. Introduction	2
2. Halophiles exist across all three domains of life	3
3. Diversity of hypersaline environments	6
4. Case study: Kilroot Salt Mine	10
5. Application of halophilic products	20
6. Concluding remarks	24
References	25
Further reading	32
2. Antifungal activity of lactic acid bacteria and their application in food biopreservation	33
Houssam Abouloifa, Ismail Hasnaoui, Yahya Rokni, Reda Bellaouchi, Nabil Ghabbour, Salwa Karboune, Milena Brasca, Abdelkarim Abousalham, Bassem Jaouadi, Ennouamane Saalaoui, and Abdeslam Asehraou	
1. Introduction	34
2. Screening of LAB strains for their antifungal activity	35
3. Antifungal compounds obtained from LAB	37
4. Action mechanism of antifungal compounds derived from LAB	49
5. Identification of antifungal compounds derived from LAB	51
6. Application of LAB and their antifungal compounds as bio-preservative agents	57
7. Conclusion	66
References	67
3. Gain-of-function research	79
K.P. Saalbach	
1. Introduction	80
2. Gain-of-function research	81

3. The Avian influenza virus studies of Kawaoka and Fouchier	86
4. The legal framework of gain-of-function research	87
5. Coronavirus research	97
6. The debate on gain-of-function	102
7. Conclusions and recommendations	105
References	106
