# Contents

<i>Contributors</i>	vii
<b>1. Development and function of tissue-resident memory B cells</b>	<b>1</b>
Changfeng Chen and Brian J. Laidlaw	
1. Introduction	2
2. B cell response in the lungs	5
3. B cell response in the skin	12
4. B cell response in the gut	14
5. B cell response in the liver	17
6. B cell response in the gingiva	18
7. B cell response in the tumor	18
8. Approaches to induce tissue-resident memory B cells	19
9. Concluding remarks and perspective	23
Acknowledgments	24
Author contributions	24
Competing interests	24
References	24
<b>2. RNA methylation in immune cells</b>	<b>39</b>
Yunzhu Chen, Min-Hee Oh, Richard Flavell, and Hua-Bing Li	
1. Introduction	39
2. RNA methylation in innate immune cells	43
3. RNA methylation in adaptive immune cells	72
4. Future perspectives	85
Acknowledgments	86
Author contributions	86
References	87
<b>3. B cell responses to the gut microbiota</b>	<b>95</b>
Kevin W. Ng, Alvaro Hobbs, Christopher Wichmann, Gabriel D. Victora, and Gregory P. Donaldson	
1. Introduction	96
2. Commensal bacteria induce germinal centers in the gut	97
3. IgA plasma cell export and maintenance in the gut	107
4. The effect of IgA on the microbiota	112
5. Conclusion	121
References	121
