This book series “Parasitology Research Monographs 10” presents carefully refereed volumes on selected parasitological topics. Parasites have an increasing impact on animal and human health in the present times of globalization and global warming. Parasites may be agents of diseases and- often at the same time- vectors of other agents of disease such as viruses, bacteria, fungi, protozoa and/or worms. The growth in knowledge of parasitic physiology, cell structure, biotechnological and genetic approaches, ecology, therapeutic capabilities, vaccination, immunology, diagnosis, transmission pathways and many other aspects of parasitology is increasing dramatically, even in the face of the breakthroughs that have already been made. Reflecting these most recent achievements and the importance of parasites as a threat to human and animal health, the series’ broad scope concentrates on particularly hot topics that were recently covered by review articles in the journal “Parasitology Research” or in other journals. These reviews offer compact but intense insights into the ongoing research and into the methods and technologies used to control parasites. The volumes in the series build on these topics, and the volume editors are well-known experts in their respective fields. Each volume offers 10 to 20 comprehensive reviews covering all relevant aspects of the topic in focus.

Contents

1	Introduction I: Personal Insights in the Problem: What Remains to Be Done	1
	Giovanni Benelli	
2	Introduction II: Why Are Mosquitoes and Other Bloodsuckers Dangerous? Adaptations of Life Cycles and Behavior	5
	Heinz Mehlhorn	
3	Mosquito Transmission of HIV: Rare or Not Possible?	9
	Diehl Nora	
4	Dengue: A Silent Killer, a Worldwide Threat	23
	S. Sakinah, Sharmilah Kumari Kumaran, Pooi-Ling Mok, Akon Higuchi, Giovanni Benelli, and S. Suresh Kumar	
5	Vector Potential of Mosquito Species (Diptera: Culicidae) Occurring in Central Europe	41
	Helge Kampen and Doreen Walther	
6	Essential Oils from Aromatic and Medicinal Plants as Effective Weapons Against Mosquito Vectors of Public Health Importance	69
	Filippo Maggi and Giovanni Benelli	
7	Mouthparts of Bloodsuckers and Their Ability to Transmit Agents of Diseases	131
	Heinz Mehlhorn	
8	Zika Virus Epidemics: Only a Sudden Outbreak?	159
	Heinz Mehlhorn	
9	Mosquitoes as Arbovirus Vectors: From Species Identification to Vector Competence	163
	Claudia Schulz and Stefanie Christine Becker	

10	Mosquitoes and the Risk of Pathogen Transmission in Europe	213
	A. Steinbrink, S. Cunze, L. K. Koch, D. D. Doerge, S. Zotzmann, J. Kochmann, and S. Klimpel	
11	Mosquito-Borne Diseases: Prevention Is the Cure for Dengue, Chikungunya and Zika Viruses	235
	Devi Shankar Suman, Kshitij Chandel, Ary Faraji, Randy Gaugler, and Kailash Chandra	
12	Long-Lasting Insecticide-Treated Textiles Preventing from Mosquito Bite and Mosquito-Borne Diseases	281
	Michael K. Faulde	
13	Molecular Aspects of Species of the Genus <i>Aedes</i> with Epidemiological Importance	305
	Luciana Patrícia Lima Alves Pereira, Felipe Bastos Araruna, Fernanda Oliveira Sousa Araruna, Maria Cristiane Aranha Brito, Daniella Patrícia Brandão Silveira, Edilene Carvalho Gomes Ribeiro, Antônio Carlos Romão Borges, Marcelo Souza de Andrade, Emygdia Rosa do Rêgo Barros Pires Leal, and Denise Fernandes Coutinho	
14	Mosquitoes, <i>Plasmodium</i> Parasites, and Cancer: Where from, Where to?	323
	Martin Ward and Giovanni Benelli	
	Index	351
